

CHEMICAL PEELS

Make room for new, healthier skin.

Skin Solutions

A chemical peel can be used to treat many skin issues like acne, fine lines, wrinkles and hyperpigmentation. As a form of chemical exfoliation, a peel allows your skin to shed off a layer, making room for new, healthier skin.

At Skin Solutions from Plastic + Hand, our skilled aestheticians work under the direction of Plastic + Hand's experienced plastic surgeons and physician assistants. Together, we offer the latest medical treatments and physician-grade products.
