

DiamondGlow® is a next-level resurfacing technology that simultaneously exfoliates, extracts, and infuses skin with targeted serums to address specific skin quality concerns. This noninvasive skin-resurfacing treatment is designed to deliver radiant, healthy-looking skin. **To achieve optimal results, this treatment should be done in a series of 3-6.**

BENEFITS

- Minimize fine lines and wrinkles
- Lightens discoloration
- Unclogs pores
- Smoother skin texture
- Brighter and more even skin tone
- Hydrates skin

POTENTIAL COMPLICATIONS

(but not limited to)

- Mild tenderness
- Redness
- Swelling
- Itchiness

CONTRAINDICATIONS FOR TREATMENT

- Sunburned or wind burned skin
- Extremely dry skin
- Chapped skin
- Open wounds
- Active/weeping acne
- Herpetic ulcers
- Recent skin cancer on treated area
- Use of Accutane in the past 6 months/ Retin-A in the past 3 days
- Recent aesthetic procedures on area being treated (i.e., injections, chemical peels, lasers)
- Severe concurrent disease such as cardiac disorder, uncontrolled diabetes, and cancer.

WHAT TO EXPECT POST-TREATMENT

- During the treatment, you may experience a scratchy, stinging sensation. This sensation will subside during the post-treatment protocol shortly after the treatment is finished.
- Facial telangiectasia (small blood vessels) is sometimes more apparent immediately after the treatment when the skin is thin and will diminish after your skin has recovered from the treatment.
- Your skin may experience temporary tightness, mild erythema (redness), or slight swelling, which should dissipate in a few hours following the treatment.

HEALING CONCERNS

If you have any concerns, please contact Skin Solutions immediately.

POST-TREATMENT CARE

FIRST FEW DAYS

Continue cleansing and moisturizing over the next few days and be diligent with the application and re-application of sunscreen if you are exposed to the sun.

FIRST WEEK

Keep treated area clean; avoid smoking, excessive alcohol consumption, excessive exercise, perspiring, swimming, or exposing skin to heat and sun.

CRITICAL SUN PROTECTION

Follow the specific instructions of your aesthetician after treatment. In general, apply and re-apply sunscreen, avoid direct sun exposure, and wear protective hats and clothing. Diligent sunblock use may lower the risk of laser-induced hyperpigmentation (darker color).

WHAT TO AVOID

Scrubs, Toners, Glycolic Acid, and Retinol: Your skin will be sensitive for the first week or so after treatment.

Bleaching Creams: Discontinue use of your bleaching cream while your skin is tender. Restart your bleaching cream and other skin care products when instructed to do so by your aesthetician.

Waxing: You should not do any waxing of the treated area until 4 weeks after treatment.

EFFICACY FOR TREATMENT

Because all individuals are different, it is not possible to completely predict results. Some patients will have very noticeable improvement, while others may have little or no improvement.

PATIENT CONSENT

By signing this consent, I certify that I understand the risks involved in getting DiamondGlow® and give permission to Skin Solutions to perform this treatment on me. I also agree to pay this cost.
