

# GLO2FACIAL

## OVERVIEW AND CONSENT

## Skin Solutions

Glo2Facial by Geneo provides a 3-in-1 super facial to exfoliate, oxygenate, and infuse. It puts oxygen into your skin, improves your skin texture, detoxes your skin, tackles specific skin concerns, and sculpts your face with a radiant glow. **To achieve optimal results, this treatment should be performed monthly.**

### BENEFITS

- Hydrates the skin.
- Improves texture.
- Increases the permeability of the skin's protective layer. It lets custom serums absorb deeper and longer into the skin and boosts nutrient absorption.
- The hands-free lymphatic massage sculpts your face, while providing an instant reduction of redness and puffiness.

### POTENTIAL COMPLICATIONS

(but not limited to)

- Redness
- Mild tenderness
- Itchiness

### CONTRAINDICATIONS FOR TREATMENT

- Sunburned or windburned skin
- Extremely dry/cracked skin
- Open wounds
- Herpetic ulcers
- Recent skin cancer
- Use of Accutane in past 6 months
- Recent aesthetic treatments (injections, lasers, chemical peels)

### WHAT TO EXPECT POST-TREATMENT

- During the treatment you might experience a scratchy, tingling sensation. This sensation will subside once the treatment is complete.
- Facial telangiectasia (small blood vessels) are sometimes more apparent immediately after the treatment where the skin is thinner.

### HEALING CONCERNS

If you have any concerns, please contact Skin Solutions immediately.

### POST-TREATMENT CARE

#### FIRST FEW DAYS

Continue cleansing and moisturizing over the next few days and be diligent with the application and re-application of sunscreen if you are exposed to the sun.

#### FIRST WEEK

Keep treated area clean; avoid smoking, excessive alcohol consumption, excessive exercise, perspiring, swimming, or exposing skin to heat and sun.

#### CRITICAL SUN PROTECTION

Follow the specific instructions of your aesthetician after treatment. In general, apply and re-apply sunscreen, avoid direct sun exposure, and wear protective hats and clothing. Diligent sunblock use may lower the risk of laser-induced hyperpigmentation (darker color).

#### WHAT TO AVOID

**Scrubs, Toners, Glycolic Acid, and Retinol:** Your skin will be sensitive for the first week or so after treatment.

**Bleaching Creams:** Discontinue use of your bleaching cream while your skin is tender. Restart your bleaching cream and other skin care products when instructed to do so by your aesthetician.

**Waxing:** You should not do any waxing of the treated area until 4 weeks after treatment.

#### EFFICACY FOR TREATMENT

Because all individuals are different, it is not possible to completely predict results. Some patients will have very noticeable improvement, while others may have little or no improvement.

### PATIENT CONSENT

By signing this consent, I certify that I understand the risks involved in getting Glo2Facial and give permission to Skin Solutions to perform this treatment on me. I also agree to pay this cost.
